

Installation process

How to install iGuideStocks

Here are steps for the installation:

- 1) After unzipping the zip file check if JRE(Java Runtime Environment) is installed on your computer. Go to Start-> Click Run -> Type cmd and Click OK and then type following command on command prompt
java – version
If you get following output then JRE is installed your computer.

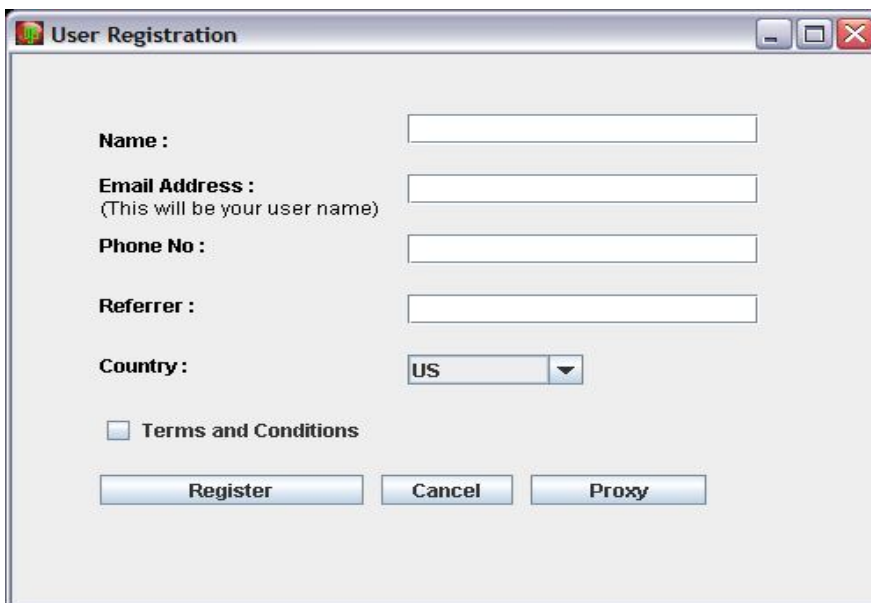

```
C:\WINDOWS\system32\cmd.exe
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings\Administrator>java -version
java version "1.5.0_16"
Java(TM) 2 Runtime Environment, Standard Edition (build 1.5.0_16-b02)
Java HotSpot(TM) Client VM (build 1.5.0_16-b02, mixed mode, sharing)

C:\Documents and Settings\Administrator>_
```

- 2) If java is not installed you will get java command not found
- 3) If java is not installed then please visit at http://java.sun.com/javase/downloads/index_jdk5.jsp and download jdk 1.5.
Note: Our software works best with JRE 1.5. Please don't install JDK 1.6 as we saw that this version is giving some problem when we tried our software
- 4) After installing JRE 1.5, double click on **run.bat** file
- 5) You will get registration screen, which will look like this

User Registration

Name :

Email Address :
(This will be your user name)

Phone No :

Referrer :

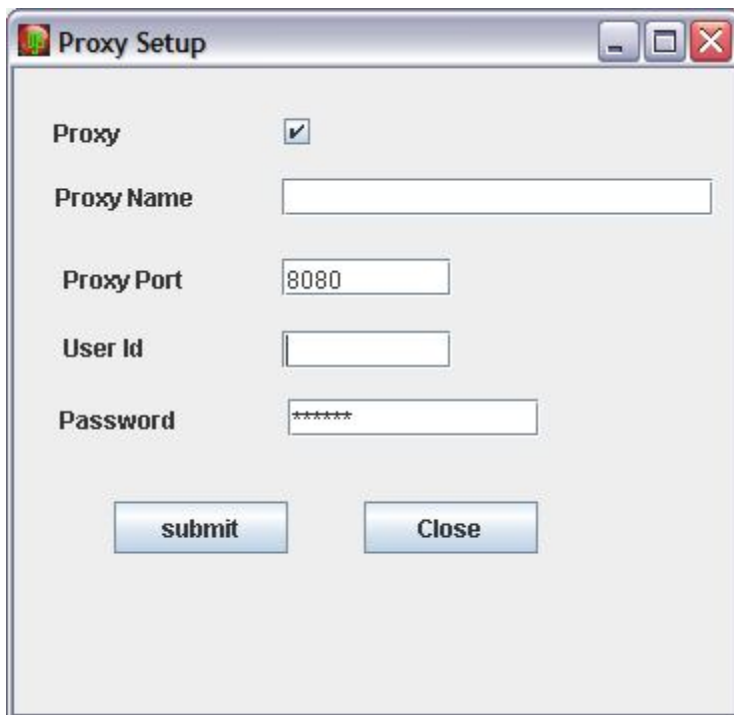

Country :

Terms and Conditions

6) Please enter all the values in the registration form. Select the country for which you want to do the technical analysis

Note: you can register only once on one machine. You can use any of your email address. For every other computer you have to provide a different id for registration.

7) If you are behind a proxy then click on proxy button to enter the proxy details. Proxy setup screen looks like this

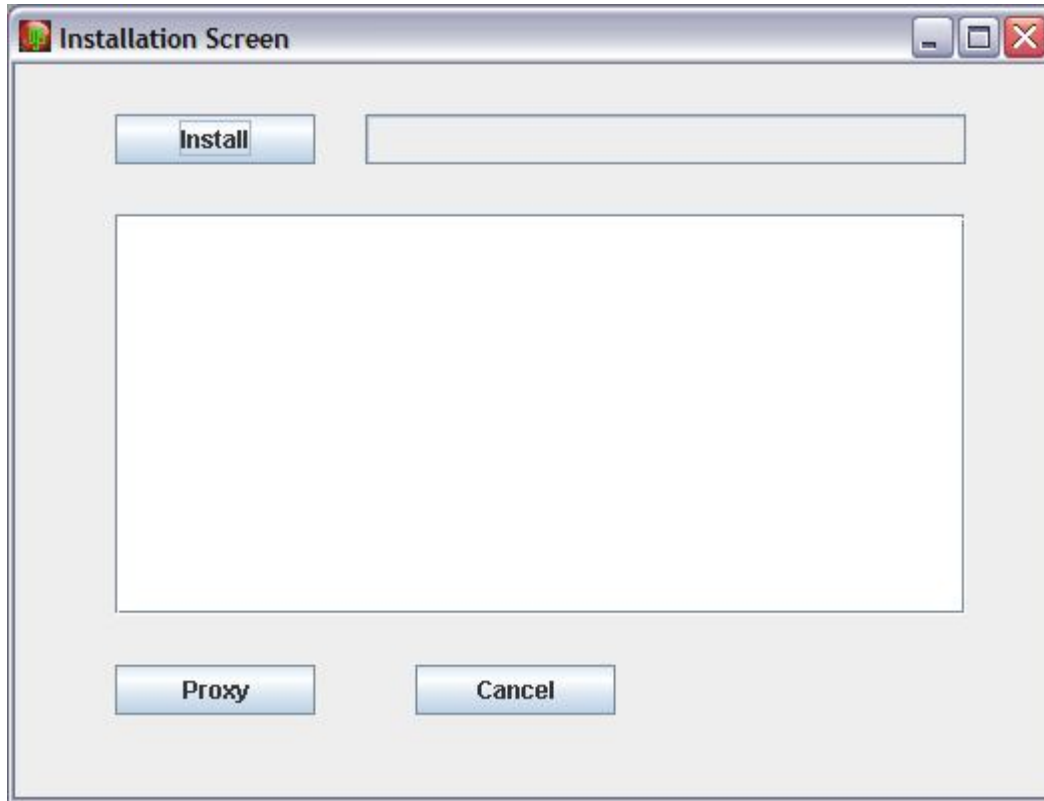

A screenshot of a Windows-style dialog box titled "Proxy Setup". The dialog has a standard title bar with minimize, maximize, and close buttons. The main area contains the following fields and controls:

- "Proxy" label with a checked checkbox.
- "Proxy Name" label with an empty text input field.
- "Proxy Port" label with a text input field containing "8080".
- "User Id" label with an empty text input field.
- "Password" label with a text input field containing seven asterisks "*****".
- At the bottom, there are two buttons: "submit" and "Close".

Enter all the details and click submit button.

You will get the installation screen

8) Installation screen

9) Click on install button.

NOTE: installation process will take few seconds.

After completion of installation process, Please restart the software

10)After restart user user will be able to do all the Technical / Fundamental analysis
